

10mm Scale Compatibility

These charts are approximate guides as even miniatures from the same manufacturer can vary in scale to one another (as happens in all figure scales, not just 10mm). Generally speaking, the miniatures from one manufacturer can be used with those one scale above or one scale below them on the chart, with the exception of the 1/200 Skytrex, which are in a scale all of their own. However, they have been included here as they were the first manufacturer to market their models as 10mm scale.
